

PLEASE TAKE NOTE: CONVERSION CARE INSTRUCTIONS

Avoid closing the roof while the tent is still wet or damp.

Please note, there will be condensation after a night's sleep in the tent. Please take care to air and dry the tent at your earliest convenience.

When closing remember the Side Windows

Pull the zips halfway up on either side of the tent leaving the top of the window slightly open to allow air to escape when closing.

Post your trip

After a long trip, we recommend airing your conversion.

Should you have any concerns

Please make contact with queries@alu-cab.co.za to assist further.

AVOID closing the tent while it's still wet or damp

**ALWAYS
AIR + DRY
TENT**

Please take care to **AIR AND DRY** the tent at your earliest convenience after each use.

**WHEN YOUR
TENT IS IN IN
STORAGE**

**IN WINTER or
NOT IN USE**

When your tent is in storage, condensation can still occur. Please remember to take out your mattress after your travels and to open the tent for ventilation as often as you can.
