

# PLEASE TAKE NOTE: CONVERSION CARE INSTRUCTIONS

**Avoid closing the roof while the tent is still wet or damp.**

Please note, there will be condensation after a night's sleep in the tent.

Please take care to air and dry the tent at your earliest convenience.

**When closing remember the Side Windows**

Pull the zips halfway up on either side of the tent leaving the top of the window slightly open to allow air to escape when closing.

Please avoid having the zip pullers at the base of the tent when closing as this will cause damage.

**When closing remember to tuck in Tent Canvas**

Make sure the canvas is tucked in on both sides before closing. If the tent is closed with canvas protruding it will cause damage to your tent.

**Post your trip**

After a long trip, we recommend airing your conversion.

**Should you have any concerns**

Please make contact with [queries@alu-cab.co.za](mailto:queries@alu-cab.co.za) to assist further.
